

Shook & Fletcher Asbestos Settlement Trust Electronic Releases

For claims received prior to July 1, 2016, the approved release forms for the Trust are posted on the MFR website. The Trust currently allows firms to generate releases and if they so choose, to submit the original releases prior to receiving offers. Claims with releases attached and approved at the time of review go directly into the payment queue. If no release has been received the offer notices are sent and claims go into the payment queue when the release is received and approved. MFR will continue to use the current process for all claims received as of July 1, 2016.

For claims received on or after July 1, 2016, after a claim has been reviewed and approved for offer the applicable release form will be generated including a header with name, claim #, last 4 digits of ssn, and a QR code unique to that claim. Firms will receive an excel listing of claims with offers and the releases will be attached in pdf format. The executed releases may then be either attached to the claim electronically or the original document may be mailed to MFR. The Old Release forms will not be accepted
